CARE AND CLEANING GUIDELINES

for Chrome and Vibrant® PVD colors/finishes

- Always test your cleaning solution on an inconspicuous area on the product before applying it to the entire surface
- Do not allow cleaners to sit or soak on the product.
- Wipe surfaces clean and rinse completely with water immediately after applying cleaners
- In the rare occurrence of stubborn stains on Cast Iron surfaces, use abrasives or abrasive cleaners sparingly.
- Clean stainless steel surfaces once a week. Do not use cleaners containing chloride on stainless steel. If used, rinse the surface immediately to prevent corrosion.
- Wherever gold or platinum is used on decorative products, use only warm water to clean and then dry with a soft cloth.
- Use a soft dampened sponge or cloth to clean, never use abrasive material like a bristle brush or scouring pad.
- Do not use cleaners containing ammonia, bleach, or acid. Most toilet cleaning products have high acidic content which can damage the chrome finish, hence they should not be used to clean chrome finish.
- Use the **Kohler Cleaning Solution** to clean chrome and PVD faucet surfaces. The Kohler Cleaning Solution removes mild dirt-stains, soap scums and water marks.
- Use a mild detergent (such as dishwashing soap). Do not use abrasive cleaners.
- Rinse and be sure to wipe the entire surface dry.

The ideal cleaning technique is to always blot dry any water from metal surfaces. Allowing water to evaporate on metal will form water deposits. It is important to use a dabbing action to dry metal, not an abrasive or rubbing action. Cleaning with a damp sponge and buff drying should keep your faucet safe.

**** Never use cleaners containing abrasive cleansers, ammonia, bleach, acids, waxes, alcohol, solvents or other products not recommended for chrome. This will void the warranty.**
